

## PAPER PREPARATION GUIDE AND SUBMISSION INSTRUCTIONS FOR 2022 EUROPEAN CONFERENCE ON COMPUTING IN CONSTRUCTION

John Modeller<sup>1</sup>, Jane Simulator<sup>2</sup>, and Another Author<sup>3</sup>

<sup>1</sup>Technical University, Cambridge, MA

<sup>2</sup>Another Institution, Some City, Some Country

The names and affiliations MUST NOT be included in the draft submitted for review.

The header consists of 10 lines with exactly 14 point spacing.

The last line below should be left blank.

### Abstract

This document explains how to prepare a paper for submission to the 2022 European Conference on Computing in Construction. It also includes the instructions for submission and some other information. This document can also be used as a template with **L<sup>A</sup>T<sub>E</sub>X**.

### Introduction

The paper should be prepared in A4 size with 25 mm margins at top and bottom, and 20 mm margins at left and right. Use font type Times (Times New Roman) for the entire document with different style at different parts of the paper, as explained later in each section.

The top section of the first page of the paper is used for the title of the paper, list of authors, and authors affiliation. This section consists of 10 lines of exactly 14 points spacing.

After these 10 lines, the rest of the document is in two-column format, with a space between the two columns of 8 mm. The space between the columns should be centred on the paper.

Please DO NOT include page numbers. The paper must have no more than 8 pages.

### Parts of the paper

#### Title, authors, and authors' affiliations

Titles should be in bold font size 12 points. Do not use more than 2 lines for the title, and try to limit it to ten words.

Authors, authors affiliations, and other information should be in font size 12. More than one affiliation of an author should be indicated by numbers, superscripted after the authors name. Do not number the authors if they are all from the same institution.

You can add contact information (e-mails, telephone numbers, postal address, etc) and other information as you wish. However, the 10 lines limitation applies. If you need less than 10 lines for all the information, please leave the other lines blank.

#### Abstract

The abstract of your paper should be no longer than 100 words. Abstracts must clearly identify (i) what is the current state of the art, (ii) what are its deficiencies, (iii) what methods have been applied, (iv) what are the results, and (v) what is the lasting contribution of the submission.

### Main body

The main body of the paper should contain (but not be limited to):

- Introduction
- Simulation and/or experiment
- Discussion and result analysis
- Conclusions
- Add other sections as you wish

The headings of each section should use 12-point font, capitalized and underlined, with 6 and 3 points spacing above and below. The headings of the subsection should NOT be numbered, use 10-point size and bold, with 6 and 3 points spacing above and below. The text should be typed in 10-point font with spacing of 12 points. Each new paragraph with a section should begin with an indentation of 5mm. Use style Body running. Neither the sections or subsections should be numbered. Add the following sections if applicable:

- Acknowledgements
- Nomenclature

### Figures and Tables

Figures and Tables are preferably included in the text where they are discussed rather than at the end of the paper. Both must have a number and caption. Figure captions should use 9-point font. Figure 1 is an example of an image graph in the text with a caption below the figure. Please include a 3-pt blank line above the figure and below the caption (formatting style "Small Space"). Make sure text elements in figures are easily readable, high-resolution images are preferable. Colour images are welcome.

Figure 1: Example Figure layout.

Oversized figures and tables may be included across both columns of the text (e.g. Figure 2). However, you should arrange the layout properly so that such images appear at the top or the bottom of the page, or on a separate page.

Table 1 shows an example of a table, where the caption should be on the top of the table. The caption should be on the top of the table. Please include a 3-pt blank line above the figure and below the caption (formatting style

# 2022 EC<sup>3</sup>

Figure 2: Example of a double width image

“Small Space”). Tables should include borders at the top and bottom of the header row. Tables should include a border under the bottom row of the table. Tables should not include vertical borders (i.e. left and right borders).

Table 1: Example of a table where the caption should be on top of the table

Heading 1	Heading 2	Heading 3
Entry 1A	Entry 2A	Entry 3A
Entry 1B	Entry 2B	Entry 3B

## References

All publications cited in the text should be listed at the end of the paper and should be ordered alphabetically by author name. All lines, other than the first in each entry, should be indented. In the main text, use the Harvard referencing style, e.g. (Lilis et al. 2017) or ODonnell et al. (2013).

## Equations

Each significant equation or formula should be displayed on a separate line. Center equations and place consecutive equation numbers flush right in parentheses. For example,

$$a^2 + b^2 = c^2 \quad (1)$$

Mathematical symbols should be clear to avoid ambiguities. Equations should be referenced by their number as in (1). Symbols used in equations and in the main text should be italicised. A brief description of the symbols used in your paper should be added in a nomenclature section at the end of the text or inline with the text where the symbols are first used.

## If you use L<sup>A</sup>T<sub>E</sub>X

This document can be used as a template for use with L<sup>A</sup>T<sub>E</sub>X. Please use the style for each section, as it has been defined in this template. You can use this document directly, cut-and-paste your content from other document(s) into this document, or import this style into another document (open the style organizer(Format Style and click organizer) and replacing all styles with those from this

document). Submission of the paper must be in PDF format.

## Submission instructions

1. To enable the blind review process please do not include your name and affiliation on the draft submitted for review.
2. Please convert your entire document to PDF format. Other formats are NOT acceptable.
3. Papers must be 4 to 8 pages long.
4. You can use any file name, but please do not use special characters, umlaute, etc.
5. The maximum file size is 10MB, but please use vector graphics where possible to reduce your file size.
6. If your paper has not met the requirements for submission, your file will not be processed for review and you will be requested to resubmit. If everything is in order, the paper will be uploaded to the review area of the conference website.

## Conclusions

This paper has described how to prepare a paper for submission to the 2022 European Conference on Computing in Construction. Good luck with your paper.

## Acknowledgments

This document was derived from the author guidelines used for the 2003, 2005, 2008, 2014, and 2017 Building Simulation Conferences and the 2019 EC3 Conference.
